PROFESSIONAL SUMMARY

Healthcare operations and data analytics professional with 5+ years of experience in EHR implementation, operational reporting, workflow optimization, and healthcare SaaS. Skilled in Python, SQL, PostgreSQL, ETL, statistical analysis, and healthcare analytics. Focused on using data to improve operational performance and business decision-making.

TECHNICAL SKILLS

Programming: Python, SQL, R (*Libraries: Pandas, NumPy, Requests*)

Databases: PostgreSQL

Analytics: ETL, Data Wrangling, EDA, Statistical Analysis, Data Modeling, A/B Testing, Logistic Regression

Visualization: Excel, Matplotlib, KPI Reporting, Dashboard Reporting

Tools: Git, GitHub, Jupyter Notebook, Salesforce, Google Workspace

Healthcare: EHR, RCM, HIPAA

PROFESSIONAL EXPERIENCE

Neuro Emotional Technique (NET) Therapy Practice | Remote

Practice Operations & Data Assistant | Sep 2025 – Present

- Maintained data quality and integrity within the ClinicMind EHR.
- Analyzed website, social media, and Google Business performance metrics.
- Produced operational reports and standardized workflows to improve efficiency.

ClinicMind | Remote

High-Value Onboarding Account Manager • Team Lead • Client Education Specialist

Apr 2021 – Sep 2025

- Earned three promotions supporting enterprise healthcare organizations.
- Led 19 enterprise EHR implementations from onboarding through go-live.
- Analyzed adoption, CSAT, escalation, and workflow metrics to improve operations.
- Reduced average handle time by 30% through process improvements.
- Standardized credentialing and data validation, maintaining 95%+ on-time go-lives.

TECHNICAL PROJECTS

Healthcare Data Wrangling & Analytics (*Python • Pandas • APIs • Data Wrangling • Healthcare Analytics*)

- Integrated CMS Medicare and U.S. Census data to analyze county-level healthcare utilization and socioeconomic measures.
- Cleaned and merged public datasets and examined the relationship between median household income and emergency room visits per 1,000 Medicare beneficiaries.

Customer Segmentation with PCA & K-Means (*Python • Scikit-learn • PCA • K-Means • Unsupervised Learning*)

- Processed nearly 800,000 demographic records and reduced 192 features to 80 principal components using PCA.
- Built a six-cluster K-Means model and identified a customer segment representing 44.8% of customers compared with 14.8% of the general population.

EEG Motor Imagery Classification (*Python • MNE • CSP • Random Forest • Biomedical ML*)

- Developed a supervised learning pipeline using 64-channel EEG recordings from 109 participants to classify left- and right-hand motor imagery.
- Applied EEG preprocessing, CSP feature extraction, Random Forest classification, cross-validation, and class-level performance evaluation.

ML Pipeline & FastAPI Deployment (*Python • Scikit-learn • FastAPI • Pytest • GitHub Actions*)

- Built and deployed a Random Forest classification pipeline using 32,561 Census records, achieving 0.735 precision, 0.638 recall, and 0.683 F1.
- Implemented FastAPI inference, model serialization, categorical slice testing, automated unit tests, and CI checks with GitHub Actions.

EDUCATION

Western Governors University

Bachelor of Science, Data Analytics (Expected October 2026)

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- CompTIA Project+
- CompTIA Data+ (In Progress)
- Udacity: Supervised & Unsupervised Learning • ML DevOps
