PROFESSIONAL SUMMARY

Healthcare operations and data analytics professional with 5+ years of experience in EHR implementation, operational reporting, workflow optimization, and healthcare SaaS. Skilled in Python, SQL, PostgreSQL, ETL, statistical analysis, and healthcare analytics. Focused on using data to improve operational performance and business decision-making.

TECHNICAL SKILLS

Programming: Python, SQL, R *(Libraries: Pandas, NumPy, Requests)*
Databases: PostgreSQL
Analytics: ETL, Data Wrangling, EDA, Statistical Analysis, Data Modeling, A/B Testing, Logistic Regression
Visualization: Excel, Matplotlib, KPI Reporting, Dashboard Reporting
Tools: Git, GitHub, Jupyter Notebook, Salesforce, Google Workspace
Healthcare: EHR, RCM, HIPAA

PROFESSIONAL EXPERIENCE

Neuro Emotional Technique (NET) Therapy Practice | Remote
Practice Operations & Data Assistant | Sep 2025 – Present

- Maintained data quality and integrity within the ClinicMind EHR.
- Analyzed website, social media, and Google Business performance metrics.
- Produced operational reports and standardized workflows to improve efficiency.

ClinicMind | Remote
High-Value Onboarding Account Manager • Team Lead • Client Education Specialist
Apr 2021 – Sep 2025

- Earned three promotions supporting enterprise healthcare organizations.
- Led 19 enterprise EHR implementations from onboarding through go-live.
- Analyzed adoption, CSAT, escalation, and workflow metrics to improve operations.
- Reduced average handle time by 30% through process improvements.
- Standardized credentialing and data validation, maintaining 95%+ on-time go-lives.

TECHNICAL PROJECTS

Healthcare Data Wrangling & Analytics *(Python • Pandas • API Integration • ETL • Healthcare Analytics)*

- Collected, cleaned, and merged CMS Medicare and U.S. Census data using Python.
- Analyzed healthcare utilization patterns and presented findings through data visualizations.

Customer Segmentation with PCA & K-Means *(Python • Scikit-learn • PCA • K-Means • Machine Learning)*

- Processed nearly 800,000 demographic records and reduced 192 features to 80 principal components using PCA.
- Built a six-cluster K-Means model and identified a customer segment representing 44.8% of customers versus 14.8% of the general population.

Data Modeling & ETL with PostgreSQL *(Python • SQL • PostgreSQL • ETL • Database Design)*

- Designed a PostgreSQL star schema and built an ETL pipeline to transform raw JSON data into relational tables.
- Validated data integrity and structured the database for analytical queries.

Income Classification with Supervised Machine Learning *(Python • Scikit-learn • Logistic Regression • Random Forest • GridSearchCV)*

- Compared multiple classification models using U.S. Census data to predict annual income above $50,000.
- Tuned a Logistic Regression model with GridSearchCV, achieving approximately 84% test accuracy.

EDUCATION

Western Governors University
Master of Science, Computer Science, AI and Machine Learning (Expected July 2027)
Bachelor of Science, Data Analytics

CERTIFICATIONS

- CompTIA Project+
- CompTIA Data+
- AWS Certified Cloud Practitioner
- Udacity – Supervised and Unsupervised Learning Nanodegree
- AWS Certified Machine Learning Engineer – Associate (In Progress)
